

I really enjoy XM Satellite Radio's Instant Traffic and Weather stations. I tune to them often as I am on the road a lot. During long road trips it is especially helpful. We live in an area north of Los Angeles that often gets forgotten on local news talk stations. When I need traffic information, I just dial up XM and within minutes I know what the hold up is on my local highways. These stations should not be dictated by the NAB since we pay for their benefits. I would like to respectfully urge the FCC to reject NAB's petition 04-160.

Sincerely,  
Heather Klone
